

WALLMEK®

INVEST IN TIME

VERSION 4

HD TRUCK, BUS, TRAILER AND CONTRACTING

OUR TOOLS SAVE TIME

Wallmek i Kungälv AB started 1978, designing and producing special tools for auto repairs. Wallmek goes all the way from idea and design to production and distribution of a high quality product to our customers.

Today, Wallmek develops and produces special tools directly to passenger car and commercial vehicles producers (OEM) and to auto shops on the aftermarket. We excel in hydraulic tools and solutions that will do the job directly on the vehicle. Also, drainage equipment to ensure safety when doing fuel tank jobs in auto shops or draining complete vehicles at the scrapyard.

As the company's grows, more and more tools and solutions are put on the market thanks to our close contact with you (our customers). In short terms – We develop Wallmek in the direction of the products and solutions we are good at.

Our mission:

To develop, produce and offer cost efficient quality tools to our customers.

Important for Us:

Quality, Design, and Customer care.

Welcome to Wallmek

WALLMEK®

INVEST IN TIME

Save Time and Effort with the Right Tools

After years on the road, water, dirt, salt, and wear and tear can turn even the simplest vehicle repairs into time-consuming challenges. With a properly designed and efficient tool system, countless hours can be saved every day in the workshop.

Prioritizing Safety and Efficiency

Modern workshops demand skilled and experienced technicians who can perform their jobs safely and without injury. Ergonomics and a well-designed working environment are essential to retaining top talent and keeping them passionate about their work. A safe and comfortable workplace boosts productivity, enhances morale, and fosters the development of advanced skills over time.

An Investment, Not a Cost

The right tools are not an expense—they are an investment in your team's potential to complete jobs faster, safer, and more efficiently. The most costly tool is the one that fails to perform or breaks at a critical moment, leading to wasted time and frustration.

Choose Wallmek – Accept No Substitutes

When it comes to quality, there's no substitute for the original. Look out for imitations that claim to deliver the same performance—they don't. Genuine Wallmek tools are engineered for reliability and durability, and every tool proudly carries our name. Choose Wallmek to ensure you're getting the best, every time.

WE ARE WALLMEK

Innovative Solutions for Workshops

Wallmek i Kungälv AB has over 40 years of experience in developing and manufacturing specialized tools for the automotive industry. Our products are designed to make mechanics' work easier by saving time, reducing workload, and delivering optimal results. All our tools are developed in close collaboration with industry experts and mechanics to meet high standards of functionality and ergonomics.

Customer-Centric Approach

We always put the customer first. With fast and personalized service, we help our customers find the right solutions for their workshop, whether it's advice, technical support, or orders. Our products

contribute to a more efficient work environment and sustainable results.

Global Recognition

Wallmek is a trusted partner for workshops in Sweden and internationally. Our tools are exported to over 30 countries, and we have maintained a strong presence in Europe and North America. Our customers know that investing in Wallmek means acquiring products of the highest quality, proudly manufactured in Sweden.

Choose Wallmek – a partner that makes a difference in your daily work and save time.

Hydraulic lifting device for tools, hubs/wheels

HLD2025

This high-capacity, mobile lifting device is designed for use in truck and bus shops, eliminating the need for heavy lifting. Its design ensures maximum access and flexibility, allowing for ergonomically correct work on trucks, trailers, and buses.

Heavy lifting combined with poor posture poses significant risks to both the working environment and the health of mechanics.

The adjustable lifting arm for the press frame offers excellent access when replacing components like the kingpin.

With this unit, you can effortlessly remove hubs.

The provided tool fixture holds existing tools securely for hub/wheel removal. It allows for the ergonomic and safe lifting of heavy hubs, whether they include brake discs or dual wheels with brake drums, making the process much easier and safer for workers.

350 kg lifting capacity

The Occupational Safety and Health Act must be followed for everyone's safety!

The workshop becomes more profitable, the staff healthier, the work gets done safer and faster with the right equipment! The lifter can be supplemented with additional accessories and tools.

CE marked product for maximum safety!

The product meets EU health, environmental, and safety requirements.

Wheel Stud Extension

HLD2025-140

Add-on Kit with 4 Extensions for Truck/trailers

This kit is used when removing wheels together with the hub and brake drum, in cases where the original wheel bolts are too short to properly connect the hub puller 03-00016. It makes the job smoother, reduces the risk of damage, and enables a safer and more efficient disassembly process.

To be used together with HLD2025 and 03-00016-32T/45T/70T.

Universal brake caliper holder for HLD2025

HLD2025-150

This new accessory is a robust and versatile brake caliper holder, developed to complement the hydraulic lift HLD2025.

Regardless of make, the holder is universally adapted to fit most brake calipers for heavy vehicles such as trucks, trailers, and buses. Easily mounted in the lift's adjustable tool/press block fixture and enables ergonomic and safe handling when removing and installing brake calipers. The sturdy construction keeps the brake caliper in the correct position during work, which reduces the risk of incorrect loading, accidents, and wear and tear on the mechanic.

An indispensable tool in modern workshops where safety, work environment and efficiency are the focus.

In use

ERGONOMIC & POWERFUL

"The workshop becomes more profitable, the staff healthier, the work safer – with the right equipment!"

Wallmek's new hydraulic lifting device HLD2025 is designed to streamline heavy lifting tasks in the workshop – without compromising safety.

With a lifting capacity of 350 kg and high maneuverability thanks to four swivel casters (front wheels lockable), it makes working with hubs, wheels, and steering knuckles both safer and more ergonomic.

The lifting unit is built to reduce strain on mechanics during service on heavy vehicles such as trucks, trailers, and buses. The adjustable lifting

arm provides free access when, for example, replacing a king pin, and the included tool mount allows for smooth disassembly of heavy hubs – even with brake discs or dual wheels attached.

The pump is detachable and can be used directly on the floor for operations in tight spaces. The HLD2025 is CE-marked and meets EU standards for safety, environment, and health.

Universal set for Kingpin

03-00031-32T

This set is designed to cover most Kingpins on the market, also the conical types.

It's used with 32 ton hydraulic cylinder designed with punching capability. This function makes it possible to hammer on the cylinder (with punch adapter fitted) during maximum pressure. The combination of high pressure and vibrations is very efficient and often crucial for a successful result. With this tool, heating or heavy lifting in the shop press is no longer needed. The compact design makes it possible to do the job on busses where the access is limited.

The set is used with the brand specific add on kits that are also available.

Used with 32 ton hydraulic cylinder (03-00028)

Parts in the set

Pressblock 03-00031-001:

- 03-00031-002 - Plate with thread (2 pcs)
- 03-00003-004 - Support rod 500 mm (2 pcs)
- 03-00003-005 - Screw M22x60 12.9 (4 pcs)

Individual details in this set:

- 03-00048-030 - Adapter plate
- 03-00048-031 - Press pipe 42 mm
- 03-00048-032 - Press pipe 85 mm
- 03-00048-033 - Press pipe 130 mm
- 03-00048-034 - Press pipe
- 03-00048-035 - Press socket
- 03-00006-020 - Press axle L=30 mm Ø31mm
- 03-00006-002 - Press axle L=120 mm Ø31 mm
- 03-00006-001 - Press axle L=230 mm Ø31 mm

*Innovative high quality tools
will help improve your business*

NO COPIES – ONLY ORIGINALS

Behind every innovative tool from Wallmek are hundreds of hours of development, testing, and refinement. Our ideas become reality to simplify your work and truly maximize your productivity.

SWEDISH INNOVATION & PRECISION

All our products are developed and assembled in Kungälv, Sweden. Wallmek represents Swedish innovation, precision, and genuine craftsmanship. We combine technology and experience to deliver top-class tools – with a strong focus on quality, safety, and sustainability.

PATENTED SOLUTIONS FOR YOUR SAFETY

We invest in patents and protections to continue delivering safe, smart, and long-term tool solutions. Thank you for helping us identify and take a stand against dangerous copies and companies that choose to imitate rather than innovate.

Choosing copies means compromising both safety and profitability. The right tool gets the job done – the wrong one costs you time and money.

SAFETY & CE CERTIFICATION AT WALLMEK

At Wallmek, safety is a given. Our CE-marked tools meet the EU's requirements for safety, health, and environmental protection.

We develop products that reduce strain, simplify tasks, and create safer work environments. Safety is a cornerstone of everything we do.

*Choose the original. Choose Wallmek.
For safety, quality, and your business.*

Add on set for Mercedes Actros and Atego kingpin

Lock ring tool

01-00004

A type of lock ring tool which makes removing and refitting of wheel bearing lock rings very easy.

The tool is designed to fit both passenger cars, light commercial vehicles and trucks. The adjusting screw has a 1/4" ratchet grip which provides enough power to easily remove stuck and rusted lock rings.

The grip angle between the tips will also always be correct no matter the size or position of the lock ring. This makes the tool safer, more effective and easier to use than ordinary pliers.

The tool is delivered with a total of 3 pairs specially designed tips that can easily be switched if needed.

6" for superior access.

Wheel/Rim Puller for Heavy Duty truck, Bus and Trailer 22,5", 19,5" and 17,5" rim size

The Rim Popper is designed for maximum efficiency and safety when pulling off seized wheels/rims. In just minutes the rim is pulled loose, quick and easy with very little effort by the user.

- Simple, quick, safe and problem free demounting of the rim.
- The three press rings cover truck, buss and trailer rims with the following sizes: 22,5", 19,5" and 17,5"
- By utilising two strong bolts, one after the other, rims can be pried off with a 1/2" impact gun.

The four rim hooks are designed to fit in almost any rim ventilation hole and cope with the power needed to get the job done. The set comes in a sturdy foam that can also be fitted in our tool trolley 04-00022.

This tool is a real time and effort saver for all shops that encounter stuck and seized wheels on trucks, busses or trailers. Old fashion methods can be devastating for the staff, wheels and also the productivity in the shop.

No more hard physical work with sledge hammer, prybar or heating!

EU Patent No. EP4052924

The set comes in a sturdy foam that can also be fitted in our tool trolley 04-00022

1. Mount the ring
2. Mount the bar
3. Mount hooks and chain
4. Pull off with an impact gun

In use

"I just want to say that the rim popper for HD, truck, trailer and bus is super efficient..."

Patrik Larsson, Grönnäs Autoservice Sweden

Hub puller, Bolt pattern 8/275, 10/335

This tool is flexible and fits heavy trucks/buses and trailers with 8 bolt Ø 275 mm and 10 bolt Ø 335 mm.

Choose set depending on the cylinder size in use. The plate with a 2½" thread can also be used as a part in the press block 03-00031-001 and 03-00048.

The tool is used with 32 / 45 / 70 tons hydraulic cylinder 03-00028 / 03-00026 / 03-00044. The robust design even allows punching with a hammer on the cylinder during max pressure. This function makes it possible to press out hubs also with unit wheel bearings from straight axles.

EU Protected Design - RCD No. 003068006-0001/0002

Contains these parts: 03-00016-32T

03-00016-32T

- 03-00016-001 – Press foot for hub puller (2 pcs)
- 03-00031-002 – Plate with thread
- 03-00003-005 – Screw M22x60 12.9, Hex socket(4 pcs)
- 03-00006-021 – Pressplate
- 03-00006-001 – Press axle 250 mm Ø31mm
- 03-00006-002 – Press axle 140 mm Ø31mm
- 03-00006-020 – Press axle 50 mm Ø31mm

32T

Contains these parts: 03-00016-45T

03-00016-45T

- 03-00016-001 – Press foot for hub puller (2 pcs)
- 03-00031-002 – Plate with thread
- 03-00003-005 – Screw M22x60 12.9, Hex socket (4 pcs)
- 03-00048-042 – Extender 50 mm Ø38mm
- 03-00048-043 – Extender 70 mm Ø38mm
- 03-00048-044 – Extender 100 mm Ø38mm
- 03-00032-002 – Press axle 140 mm Ø38mm
- 03-00032-001 – Press axle 30mm Ø38mm

45T

Contains these parts: 03-00016-70T

03-00016-70T

- 03-00016-001 – Press foot for hub puller(2 pcs)
- 03-00031-002 – Plate with thread
- 03-00003-005 – Screw M22x60 12.9, hex socket (4 pcs)
- 03-00048-042 – Extender 50 mm Ø38mm
- 03-00048-043 – Extender 70 mm Ø38mm
- 03-00048-044 – Extender 100 mm Ø38mm
- 03-00048-040 – Press axle 37mm Ø38mm
- 03-00048-041 – Press axle 147 mm Ø38mm

70T

Extender for hub puller

03-00006-025

For use with hub puller 03-00016-32T/-45T or 03-00016-70T on axels with hub reduction/gear inside the hub (4 pcs needed). M22, 50 mm. For example Scania.

70T

Press plate SAF 110/88 mm

03-00016-011

The press plate is designed for hollow wheel axles and are used when pressing hub/bearing off the axle with hub puller set 03-00016. The plate is designed to fit the accessible surfaces and also withstand the power needed for demounting the hub from the axle.

70T

Hub puller for 17,5" rims, low loader trailers with 10/225 hubs

03-00022

Extension set to 03-00016 for removal of 225 mm hubs and 10 bolts.

Hydraulic cylinder 03-00028 (32 ton), 03-00026 (45 ton) or 03-00044 (70T) is used with the set. The heavyduty design supports a full 70 ton pressure and hammer strokes in the direction of pressure (on the cylinder) during removal. This makes it possible to remove hubs with unit bearings on straight axles.

Contains these parts:

- 03-00022-001 – Plate (2 pcs)
- 03-00022-002 – Arm (4 pcs)
- 03-00022-003 – Thrust washer SAF Ø 73 mm
- 03-00003-005 – Screws M22x60 12.9 (8 pcs)

70T

EU Protected Design - RCD No. 003068006-0001/0002

In use

Plate with thread for press block (not included)

03-00031-002

Included in universal set 03-00031-32T/45T and 03-00048.

Puller set with press rod for hubs without wheel bolts

03-00027-32T / 03-00027-45T

The set makes it possible to efficiently remove rusted bearings with external hubs from straight axles

Developed for Volvo FL, MAN TGA, TGS, TGX, Mercedes Atego, Actros, Renault Kerax, Magnum, Midlum and Premium, fits also other brands with the same bolt dia. The tool is used with hydraulic cylinder 03-00028 (32 ton), 03-00026 (45 ton) or 03-00044 (70 ton).

Contains these parts:

- 03-00027-010 - Plate
- 03-00027-012 - Adapter M82x2-G2 ½"-11
- 03-00027-002 (M24) - Press rod

Dismantling set, Volvo/Mack/Renault/DAF floating brake disc

03-00025

A tool that really helps when floating brake disc needs to be removed.

The brake disk is pressed out one cylinder at a time. This is very efficient and saves a great deal of time in the workshop. Using extreme pressure in the workshop press on sensitive metal parts or cutting the brake disc are both noisy and dangerous. This hydraulic cylinder does the same job in a controlled manner safely and easily.

The tool consists of two special cylinders and a control valve for crosswise pressing.

Pressing out the disc in this way only takes a few minutes.

Used with 1030 or 1036

In use

MAX 40 Ton

Dripfree quick coupling set for 03-00025

03-00025-010

A quick coupling kit that increases the range of use for the tool.

Individual use of hydraulic cylinders and flexible adjustment if necessary.

Contains these parts:

1. RES4304 - Hydraulic quick coupling, female 1/4" (2 pcs)
2. RES4306 - Hydraulic quick coupling, male 1/4" (2 pcs)

Hydraulic cylinder 14 ton with hose and coupling

03-00034

The compact cylinder makes it possible to separate parts, even in tight spaces where normal cylinders won't fit. This type of job is done in any automotive garage, industry or maintenance shop.

Contains these parts:

1. 03-00019 - Hydraulic press cylinder 14T
2. 03-00019-010 - Hose 0,5 m
3. RES4306 - Cejn quick-coupling hydraulic male 1/4"

Max pressure: 700 bar
Max pressure: 14 ton
Weight: 2,3 kg

Stroke: 41 mm
Stroke: 0,5m

Spring bolt set (Scania)

A tool set for quick dismantling of the spring bushing bolts.

The job is done directly on the truck with a minimum of part removal. The set is used with the threaded plate 03-00031-002 from the press block 03-00003-001 (none of these are included), also designed for punching. The combination of the high pressure and vibrations is very efficient and often crucial for a successful result when pressing out the rusted bolt.

The set is used with hydraulic cylinder 03-00028 (32 ton) or 03-00026 (45 ton).

Contains these parts:

1. 03-00004-001 - Press block
- 1a. 03-00004-002 - Plate without thread
- 1b. 03-00004-003 - Support rod (2 pcs)
- 1c. 03-00003-005 - Screw M22x60 12.9, hex (2 pcs)
2. 03-00006-009 - Press axle 115 mm Ø29 mm
3. 03-00006-010 - Press axle 100 mm Ø29 mm
4. 03-00006-011 - Press pipe 60 mm Ø54 mm
5. 03-00003-005 - Screw M22x60 12.9, hex (2 pcs)

03-00008-32T

Contains these parts:

1. 03-00004-001 - Press block
- 1a. 03-00004-002 - Plate without thread
- 1b. 03-00004-003 - Support rod (2 pcs)
- 1c. 03-00003-005 - Screw M22x60 12.9, hex (2 pcs)
2. 03-00032-102 - Press axle L=65 mm. Ø=29 mm (2 pcs)
3. 03-00032-101 - Press axle M30. L=137 mm. Ø=29 mm
4. 03-00006-011 - Press pipe 60 mm Ø54 mm
5. 03-00003-005 - Screw M22x60 12.9, hex (2 pcs)

03-00008-45T

In use

Adapter M22 – M30x3,5

03-00040-001

Adapter M22 – M27x3

03-00040-002

The adapter makes it possible to pull out M30 bushing bolts with the 32 Ton cylinder 03-00028. An appropriate press pipe is used in combination with the adapter when pulling.

Adapter M22 – M24x2

03-00040-003

Adapter M22 – M24x3

03-00040-004

The adapter makes it possible to pull out M24 bushing bolts with the 32 Ton cylinder 03-00028.

An appropriate press pipe is used in combination with the adapter when pulling.

Hydraulic ball-joint puller, 8,8 ton**04-00028**

Unique design that efficiently presses out the ball joints and brake/slack adjuster on trucks, busses and trailers.

Also wheel bolts are dismantled and fitted very smoothly thanks to the flexible design (see pictures below).

The press tools can be rotated for different ground heights, the two supplied distance rings provide the adjustment options required for these jobs. The anvil tool has an opening of 42 alt 57 mm depending on what side is chosen. In addition, the two tools can change position on the cylinder for superior access in tight spaces inside the wheelhouse, around sway bars or hidden steering joints on buses, etc.

The hydraulic cylinder presses up to 8.8 tons for easy, safe and smooth removal. A safety belt is supplied with the tool to prevent the tool from falling down during work.

Used with 700 bars of hydraulic pump 1030 or 1036

Contains these parts:

1. 04-00028-021 – Press tool
2. 04-00028-022 – Anvil tool
3. 04-00028-019 – Distance ring 16 mm
4. 04-00028-020 – Distance ring 26 mm
5. 04-00028-011 – Safety strap
6. RES4306 – Hydraulic quick coupling male 1/4"

EU Patent No. EP342644, US Patent No. US 10.807.222

**In use****Anvil tool 34-37 mm****04-00028-302**

Add-on to 04-00028 8.8T for smaller ball joints on pick-up trucks, EVs, SUVs, and light commercial vehicles.

This tool is an accessory to the base tool 04-00028 and makes it suitable for use on ball joints in control arms, tie rods, and wheel bolts on smaller trucks and commercial vehicles, including heavier EV, hybrid, and SUV models. The dimensions of the pivoting counter-hold tool are 34 mm and 37 mm.

**Scania Next Generation (NG), 2017 - Pitman/Steering rod tool****03-00047**

New unique method for easy disassembly of the Pitman/steering rod ball joint on Scania Next Generation.

The tool makes it possible to disassemble the ball joint quickly and easily, no disassembly is required for access. The wheels are turned 70 – 90% to the right, good access is then possible under the vehicle.

The hydraulic cylinder simply pushes the ball joint free with the help of a conical plate inside the support box. No blows or breaks are required that could otherwise adversely affect the steering gear. The tight space between the frame and ancillaries inside the steps to the cab prevents the fitting of other tools without extensive disassembly.

The kit includes an 8.5T hydraulic cylinder (03-00015, part 7) and press parts (03-00047-010, part 1-6).

Rec Cylinder: 03-00028**In use****Contains these parts:**

1. 03-00047-011 - Press house
2. 03-00047-012 - Press block conical
3. 03-00047-013 - Pull socket
4. 03-00047-014 - Pull nut
5. 03-00047-015 - Safety strap
6. RES4016 - Drawbar M14 L=250 mm
7. 03-00015 - Hydraulic cylinder 8,5 ton

**NEW**

Hydraulic ball joint puller

03-00030

Press clamp for demounting steering joints on trucks/buses and ball-joints on light commercial vehicles.

See also 04-00028. This clamp is specially designed to fit most steering axles and ball-joints on light commercial vehicles, heavy trucks and buses on the market.

Contains these parts:

- 03-00014-001 – Steering joint puller
- 03-00015 – Hydraulic cylinder 8,5 ton

In use

Accessory to 03-00015

Press plate

Fits the press side of 03-00015. See page 45

Automatic brake adjuster puller/ steering joint on trailers

03-00005-001

Used for pressing out rusted and seized axles from the brake adjuster.

Fits most types on the market from Haldex and BPW. See also 04-00028. The tool is used with a 8,5 ton hydraulic cylinder 03-00015 (not included).

The design allows good access even in tight spaces on the vehicle.

Press block set for pulling out truck/trailer coupling with VBG 55 mm axle

03-00017

With this set the complete pulling connector is pulled out from its holder when maintenance is needed.

This solution saves a lot of time and efforts during dismantling. It is used with one of the following cylinders; 1090-02 or 01-00030.

In use

Wallmek recommends

Adapter for VBG drawbar bolts

03-00006-012

The adapter is used with Kingpin set 03-00031, pressing out bushing bolts on VBG drawbars (not hex bolts).

The bolt is pressed out in a similar way as the kingpin but with the press frame in a horizontal position.

Bushing set for VBG drawbars

03-00010

This set is primarily designed for VBG bushings and drawbars but is also universal. The bushing is replaced using the 32 ton hydraulic cylinder 03-00028 (not included) with the unique punching function directly on the drawbar.

The bushing is replaced quickly without needing to heat the part.

Contains these parts:

- 03-00048-033 – Press pipe 130 mm
- 03-00048-031 – Press pipe 42 mm
- 03-00006-013 – Press plate Ø59 mm

In use

3

Air hammer for tie rod ends

04-00030

This air hammer is developed for efficient work on tie rod ends on trucks and buses, either for replacing or only making adjustments.

Vibrations in combination with rust dissolving liquid make the threads adjustable again. This version is reinforced and improved for daily use in a shop environment. 3000 rpm, vibration dampened handle and bracket for better ergonomics.

Fixed wrench 34 mm

04-00031

Powerful and slip free wrench for tie rod ends with 34 mm 6 point grip

The wrench is used in combination with the air hammer 04-00030 for adjusting or replacing the tie rod ends on truck and buses.

03-00037

Mounting tool for slotted bushings

The clamp in this set is used in combination with the different adapters for compressing slotted bushings on trucks and buses.

A vise is used to easily compress the bushing, a lock pin is then tapped in and locks the clamp during mounting of the bushing. No fragile bolts or threads to be used with this system! The set fits the following sizes; 95, 85, 80, 75, 70 and 65 mm. This set is used with bushing set 03-00038 that includes dismantling and mounting plates and pipes in proper dimensions.

Contains these parts:

- 1. 03-00037-001 - Clamp Ø95 mm
- 2. 03-00037-065 - Adapter set Ø65 mm
- 3. 03-00037-070 - Adapter set Ø70 mm
- 4. 03-00037-075 - Adapter set Ø75 mm
- 5. 03-00037-080 - Adapter set Ø80 mm
- 6. 03-00037-085 - Adapter set Ø85 mm

03-00037-200

Adapter set for slotted bushings

Add on set for 03-00037 for the following sizes; 50, 56, 58, 60, 63 and 68 mm.

The set is used with bushing set 03-00038 which contains dismantling details and washer in good usable sizes.

Contains these parts:

- 1. 03-00037-050 - Adapter set Ø50 mm
- 2. 03-00037-056 - Adapter set Ø56 mm
- 3. 03-00037-058 - Adapter set Ø58 mm
- 4. 03-00037-060 - Adapter set Ø60 mm
- 5. 03-00037-063 - Adapter set Ø63 mm
- 6. 03-00037-068 - Adapter set Ø68 mm

Bushing set with fixing plate

03-00038

The combination of sizes on the press pipes and press plates makes the set very useful on commercial vehicles, either directly on the chassis or in the shop press. The fixing plate in the set makes it possible to fix the press pipes to the bottom of the press block. This makes the job easier, less parts needs to be centered by hand during mounting or demounting.

The set can be complemented with 03-00037 to get a complete solution for slotted bushings. The set can be used with the press block 03-00031-001 or a 32 tons hydraulic cylinder 03-00028.

Adapter for the cylinder is included in the set

Contains these parts:

- 1. 03-00038-028 - Press pipe, A 110mm, B107mm, C96mm, D100mm
- 2. 03-00038-027 - Press pipe, A 93,5mm, B 91,5mm, C 88,5mm, D100mm
- 3. 03-00038-026 - Press pipe, A 89,5mm, B 87mm, C 73mm, D 100mm
- 4. 03-00038-025 - Press pipe, A 84,5mm, B 82mm, C 72mm, D 100mm
- 5. 03-00038-024 - Press pipe, A 79,5mm, B 77mm, C 67mm, D 100mm
- 6. 03-00038-023 - Press pipe, A 74,5mm, B 72mm, C 62mm, D 100mm
- 7. 03-00038-022 - Press pipe, A 69,5mm, B 67mm, C 57mm, D 100mm
- 8. 03-00038-021 - Press pipe, A 64,5mm, B 62mm, C 52mm, D 100mm
- 9. 03-00038-011 - Press plate, A 64,5mm, B 52,5mm, C 51,2mm, D 32mm
- 10. 03-00038-012 - Press plate, A 69,5mm, B 57,5mm, C 56,2mm, D 32mm
- 11. 03-00038-013 - Press plate, A 74,5mm, B 62,5mm, C 61,2mm, D 32mm
- 12. 03-00038-014 - Press plate, A 79,5mm, B 67,5mm, C 66,2mm, D 32mm
- 13. 03-00038-015 - Press plate, A 84,5mm, B 72,5mm, C 71,2mm, D 32mm
- 14. 03-00038-016 - Press plate, A 89,5mm, B 77,5mm, C 72,2mm, D 32mm
- 15. 03-00038-017 - Press plate, A 93,5mm, B 81,5mm, C 76,7mm, D 32mm
- 16. 03-00038-001 - Press adapter 30mm
- 17. 03-00038-002 - Press adapter 86mm
- 18. 03-00038-003 - Cylinder adapter (for 32 T)
- 19. 03-00038-004 - Fixing plate

Delivered in a foam

011-017

Adjustable press block holder

04-00025

The holder makes it possible to work at any angle with the press block 03-00031-001 with a cylinder mounted to it.

A gearbox lift or similar with wide wheel base can be used for the holder. The inner diameter is 25 and 30 mm.

The many positions on the flange in combination with the swiveled head maximize the access under the vehicle.

The holder is developed to be used with bushing set 03-00037 and 03-00038.

Fits directly on the press block 03-00031-001

Bushing set - BPW Ø119 mm & ROR Ø139 mm rubber steel bushes

03-00046

This set makes replacing bushes on BPW and ROR axles with our hydraulic cylinders an easy job.

This set is also available as an add-on (03-00046-050) to SAF, JOST, MB and, ROR set 03-00013 for Ø150 mm bushes of the same type.

Contains these parts:

- 03-00046-001 - Press plate BPW
- 03-00046-002 - De-/mounting ring BPW/ROR
- 03-00046-003 - Tapered mounting ring BPW
- 03-00046-004 - Dismantling ring ROR
- 03-00046-005 - Tapered mounting ring ROR
- 02-00011-002 - Press sleeve
- 03-00013-003 - Dismantling/install washer
- 1091-17-02 - Press plate

Used with our 32 ton cylinder 03-00028

In use

"An efficient tool that not just makes it simple to do the job, it's also a lot more fun."

- Stefan Lundgren, Volvo Truck Center Helsingborg, Sweden

Dismantling

Install

Bushing set SAF-axle Ø150 mm

03-00013

A set for quick and easy replacement of the large 150 mm bushing in SAF, MB, Jost and ROR axles. The set is used with the 32 ton hydraulic cylinder 03-00028 (not included).

Use with 32 ton hydraulic cylinder 03-00028

Contains these parts:

- 03-00013-001 - Tapered mounting ring 45mm
- 03-00013-002 - Dismantling/install ring 20mm
- 03-00013-003 - Dismantling/install plate
- 1091-17-02 - Press plate
- 1091-17-03 - Press sleeve
- RES4034 - Drawbar M22, 500mm

In use

Spring bushing set, universal

03-00009

The spring and shackle bracket bushings (44–64 mm) are quickly and easily replaced. No heating or lifting in the shop press is needed when working with this set.

Used with 32 tons hydraulic cylinder 03-00028

Contains these parts:

- 03-00048-033 - Press pipe 130 mm
- 03-00048-031 - Press pipe 42 mm
- 03-00006-014 - Press plate Ø63 mm
- 03-00006-015 - Press plate Ø50 mm
- 03-00006-016 - Press plate Ø44 mm
- 03-00006-017 - Press plate Ø63 mm
- 03-00006-018 - Press plate Ø57 mm
- RES4024 - Flange nut M18
- RES4026 - Drawbar M18/M22, 250 mm

In use

Universal press tool set 40,7-79,7 mm (set with press lids)

01-00003

A flexible, well thought-out and very useful set for bushings, ball-joints, smaller bearings and more.

The set consists of 29 pcs, with sizes ranging from 30,5 to 79,7 mm with small increments. An adapter and a press rod are included to be able to use press block 1090-60 and 1090-69. This is very useful when working with bushings and ball-joints without holes.

The set is delivered like in the picture with a foam that holds the pieces in place, may also be wall mounted.

Used with cylinder 01-00030 or 1090-02-WAL

01-00003 Universal set

Press pipes/sockets can be sold separately as set **01-00001** and the press lids can be sold separately as **01-00001-400**.

Delivered in a foam 01-00001-003 (290x415 mm)

In use

Universal press tool set 28,6-40,6 mm

01-00001-500

The press sockets and press tubes have 1 mm size increments to fit the smallest bushing and ball joints, covering from Ø28,6mm – Ø43,6mm.

To be used with M10 – M14 drawbar or with press block 1090-69 using press axle and press lid from universal set 01-00003. The four press tubes fit on the pulling side of the following hydraulic cylinders:
18T 01-00030 and -22T 1090-02-WAL.

Add on set to 01-00003

| Press tube art: | Ø A mm | Ø B mm | Ø C mm |

Delivered in a storage foam 04-00023-007

Press axle 01-00001-002 (incl in set 01-00003) locks in to the press lid. The lid locks on to the press tube, easy and simple to use.

When used with a pulling rod the lid is used as a stop for the nut. The press tube is locked in the lid for easy operation. Can be used with pulling rods with size M10, M12 and M14. **See page 47**

Universal puller for transmission flange on propeller shaft

03-00035

Puller for transmission flanges on prop shafts and gearboxes.

When the propeller shaft bearing needs to be replaced the flange needs to be dismantled.

It's used with an 18 tons hydraulic cylinder 01-00030 (not included).

The entire job is completed on the vehicle without heavy lifting into a hydraulic shop press.

The tool is designed for maximal adjustment and flexibility for fitting on any truck or bus axle flange. Gearboxes with retarder or other applications are also possible to fit with this tool due to its design.

Contains these parts

1. 03-00035-001 - Press foot (2 pcs)
2. 01-00041-002 - Fixing plate 1 ½" thread
3. 01-00041-003 - Sliding plate (2 pcs)
4. 01-00018-004 - Screw (2 pcs)
5. 01-00041-005 - Screw M14x45 10.9, hex (4 pcs)
6. 03-00035-002 - Bolt set M12, hex. (4 pcs)
7. 03-00035-005 - Adjustable press rod M24

EU Protected Design - RCD No. 003477090-0001/0002

EU Patent No. EP 3323553

US Patent No. US 10.532.450

03-00035-201

ACCESSORIES

03-00035-101

Thread adapter Scania M44x1,5 – M22x2,5

The adapter makes mounting of the bearing and flange a simple operation. Use a M22 rod for mounting manually or with hydraulic cylinder.

Press rod Volvo FL, M20

Protects the inner thread on the axle and makes dismantling of the flange easier.

Universal puller for prop axle/shaft bearing and pitman arm

03-00036

Adjustable and universal to cover most propshaft bearings and pitman arms.

Used with a 18 ton hydraulic cylinder 01-00030 (not included). The adjustable press feet are wedge shaped for better access.

After years on the road, exposed to dirt, water and salt, parts will eventually rust and seize. Standard or manual tools are usually not strong enough to do the job.

With the help from the 18 ton hydraulic cylinder with hammer function the job is made easy with a minimum of wear. **Heavy and risky jobs in the shop press are also minimized with this tool.**

Contains these parts:

1. 03-00036-001 - Press foot (2 pcs)
2. 01-00041-002 - Fixing plate 1 ½" thread
3. 01-00041-003 - Sliding plate (2 pcs)
4. 01-00018-004 - Screw (2 pcs)
5. 01-00041-005 - Screw M14x45 10.9, hex (4 pcs)

Rec. cylinder 01-00030

In use

"It takes longer to walk to the job than to do the job with these tools."

-Bruno Cella, Cella Auto Repair.
Bolton, Ontario, Canada.

03-00036-020

Set with 03-00035 and 03-00036-020

03-00035-300

For efficient dismantling of flanges and supporting bearing on propeller shafts and dismantling of pitman arms on steering gears. The set is delivered in a foam for practical storage. Only foam; 04-00022-016.

U Joint tool

03-00023

Tool for quick and easy replacement of U-joints on trucks and buses.

The job is one directly on the vehicle instead of heavy lifting and handling in the garage press. No need to send away these jobs. The tool saves a lot of time and improves the working environment. Adapter sets are ordered separately.

Used with 8,5 tons cylinder 03-00015

Contains these parts:

- 03-00023-002 - Plate (2 pcs)
- 03-00023-003 - Rod (2 pcs)
- 03-00023-004 - Anvil (2 pcs)
- 1090-60-04 - Bolt M16x40mm (4 pcs)

In use

Adapter set for Scania U Joints

03-00023-050

This set is designed to fit all Scania U-joints and axles; 300, 400, 500 and 600.

The job can be done with the axle partly still installed on the vehicle. The set is used with the basic tool 03-00023 and 8,5T cylinder 03-00015.

Contains these parts:

- 03-00023-005 - Press axle
- 03-00023-006 - Plate Ø47 mm
- 03-00023-007 - Plate Ø55 mm
- 03-00023-008 - Plate Ø65 mm
- 03-00023-009 - Socket Ø58 mm
- 03-00023-010 - Socket Ø68 mm
- 03-00023-013 - Plate Ø37 mm
- 03-00023-014 - Set of spacers

Wheel bearing set , front Iveco Daily 35 2014 -

02-00011

This set makes it possible to replace the bearing directly on the vehicle with up to 32 tons pressure, total time only 30 – 40 min.

ABS sensors, ball-joints etc. are left untouched with the use of a hydraulic cylinder. The specially designed press ring that is mounted behind the hub prevents any severe damage or bending in the wheel knuckle during hub removal. The set can also prepare the lock ring before removing the hub. This set can also be used in a hydraulic garage press.

Contains these parts:

- 02-00011-001 - Press ring
- 02-00011-002 - Press pipe
- 02-00011-003 - Press plate
- 02-00011-004 - Hub plate
- 02-00011-005 - Bearing plate
- 1091-17-02 - Press plate
- 1091-17-05 - Bearing plate
- 1091-17-08 - Press pipe

EU Protected Design - RCD No. 003995240-0001/0002

Rec. cylinder 03-00028

In use

Reinforced socket for dismantling the hub nut on the Iveco Daily 35

02-00011-025

It is significantly stronger than the original socket. The 4 taps are enclosed and reinforced. Can be mounted directly on a ¾ inch gun or a size 36 mm socket.

In use

Hub puller (111 mm), front, IVECO Daily 35 - 70

03-00041

This tool allows removing the hub from the axle, even if it is heavily rusted and seized. This method simplifies and severely minimizes the labor time when replacing the front wheel bearings. No need to cut the hub or crack the knuckle in the shop press anymore. Fits models from 2005 - ... with 9 holes in the brake disc/rotor. 9 pcs hex bolts for safe removal are included in the set

Used with hydraulic cylinder 03-00028 (32 tons)

Contains these parts:

- 03-00041-001 - Hub puller
- 09-000145 - Bolt M14x55, 10.9 (9 pcs)
- RES 1090-01-09 - Press foot

In use

MORE POWER THAN YOU WILL EVER

NEEDED

In an industry where precision and power are critical, Wallmek has perfected the art of combining innovation with raw force. Our hydraulic cylinders – at 32, 45, and 70 tons – are specifically designed to overcome the toughest challenges in vehicle repair and maintenance.

The compact 32-ton cylinder is an indispensable tool in truck and bus workshops, where it delivers surgical precision when pressing out conical pins, spring bolts, and bushings. Its design is tailored for tight spaces, delivering maximum power without compromising flexibility.

More power with 45-ton

For those working with heavier vehicle components, the 45-ton cylinder is a natural extension of the craft. It excels at handling straight pins and hubs – tasks that demand strength, as well as safe and controlled application.

Titan in its element

When straight pins and hubs on heavy trucks need disassembly, the 70-ton cylinder gets the job done. Built to withstand extreme stress, it delivers not only sheer force but also invaluable time savings for mechanics and workshops.

With one foot firmly grounded in the Swedish engineering tradition, we continue to drive progress – one cylinder at a time.

32 ton, page 42, Art Nr: 03-00028

45 ton, page 41, Art Nr: 03-00026

70 ton, page 40, Art Nr: 03-00044

"Problems fuel creativity! Power in every detail – Wallmek's hydraulic cylinders take the automotive industry to the next level."

Hydraulic cylinder 70 ton

03-00044

70 ton pressing and pulling cylinder. Designed for everyday use in repair shops.

Primarily for use with our hub demounting tools 03-00016, 03-00022 and 03-00027 and others. The hollow cylinder/piston allows drawbar or threaded bars up to 33 mm.

Weight: 17 kg. **Stroke** 70 mm. **Automatic return.**

WHY HYDRAULICS?

THE POWER OF HYDRAULICS IN THE WORKSHOP

Hydraulics have long been a vital part of vehicle repairs. Wallmek's hydraulic cylinders enable more efficient work directly on the vehicle, saving both time and energy.

COMPACT AND POWERFUL

Wallmek's hydraulic cylinders are both compact and powerful, ranging from 1.8 to 17 kg. They are designed to be used directly on the vehicle without the need to dismantle major components.

PULLING AND PUSHING FUNCTION

The most cylinders can both pull and push, making them highly versatile. They handle wheel bearings, hubs, and bushings with precision, and can push out axles and brake discs without the need for a workshop press.

The Advantages of Hydraulics

- Ⓢ **Precision and reliability** - Delivers controlled force for effective pushing and pulling
- Ⓢ **Versatility** - Suitable for multiple applications, making the workshop more flexible.
- Ⓢ **High power in a compact format** - Compact and powerful, yet with high capacity.
- Ⓢ **Long lifespan** - Minimal risk of mechanical wear thanks to the hydraulic design.
- Ⓢ **Time-saving** - Work can be performed directly on the vehicle without major disassembly.
- Ⓢ **Ergonomic use** - Reduces physical strain on the mechanic.
- Ⓢ **Cost-efficiency** - Lowers the need for special tools and workshop presses.

Extra power when needed: The impact body delivers additional force for seized components. With Wallmek's hydraulics, workshop tasks become simpler and more time-efficient.

Hydraulic cylinder 22 ton

1090-02-WAL

22 tons pressing and pulling hydraulic cylinder in a compact size with automatic return of piston.
Designed for everyday use in auto repair shops.

Can be used with all of our passenger car tools and draqwbars M10-M22 with the proper adapter. The cylinders hydraulic pressure can be combined with punching force when using the punching socket 1086-6. For example when pressing a rusted axle shaft

Weight: 4,7 kg. **Stroke:** 70 mm. **Automatic return.**

Delivered in a foam

Hydraulic cylinder 18 ton

01-00030

18 tons compact and light hydraulic cylinder, with pressing and pulling action and self returning piston.
Designed for everyday use in auto repair shops.

18 tons compact and light hydraulic cylinder, with pressing and pulling action and self returning piston.

Designed for everyday use in auto repair shops.

Weight: 2,8 kg. **Stroke:** 50 mm. **Automatic return.**

EU Patent No. EP 3156179, US patent No. US 10.047.772

Delivered in a foam

Hydraulic cylinder 14 ton

1090-03

14 tons pressing hydraulic cylinder in a very compact size. Designed for everyday use in auto repair shops.

Specially designed to use with press blocks 1090-55-B, 1090-60 and 1090-69.

Weight 2,5 kg. **Stroke:** 55 mm. **Automatic return.**

Contains these parts:

- 1-1090-03 - Hydraulic cylinder 14 ton
- RES 1090-01-10 - Adjustable press rod 100 mm, M24
- RES4306 - Hydraulic quick coupling, male

Hydraulic cylinder 8,5 ton

03-00015

A very compact cylinder for pressing and pulling.

The cylinder comes with an adjustable press rod and a punching socket. This cylinder is very flexible and easy to use also in tight spaces. Specially designed to be used with 03-00014-001 and 03-00005-001.

Weight: 1,8 kg. **Stroke:** 25 mm. **Automatic return.**

Contains these parts:

- 03-00015-001 - Hydraulic cylinder 8,5 ton
- 03-00015-006 - Punching socket with o-ring
- 03-00015-012 - Adjustable press rod 100mm, M22 x 2,5
- RES4305 - Hydraulic quick coupling, male 1/8"

Press plate M22

03-00015-020

Fits the press side of the 8,5 Ton hydraulic cylinder 03-00015

The press plate can be used instead of the adjustable press axle delivered with the cylinder.

Adapters for other tool systems

- 1068-04 - Adapter G1 ½" to 2 ¼" – 14UNS (Klann thread)
- 1068-05 - Adapter G1 ½" to G2 ½" – 11 (16 och 22 ton cylinder - 32 tons cylinder thread)
- 1068-06 - Adapter 2 ¼" – 14UNS (Klann thread) to 1 ½"
- 1068-07 - Adapter G1 ½" to M55x1,5 (Volvo thread)
- 1068-08 - Adapter G1 ½" to M68x2 (Paschke thread)
- 1068-09 - Adapter M68x2 (Paschke thread) to G1 ½"

Punching socket

01-00031

To be used on the piston side of the cylinder when pressing out axle shafts etc.

The punching socket allows striking by a hammer in the cylinders press direction. Depending on hammer size, the extra force is similar as 2,5 – 3,5 times more power than the cylinder power itself.

- 01-00031-018 - Punching nut **M18**
 01-00031-020 - Punching nut **M20**
 01-00031-022 - Punching nut **M22**

Cylinder holder Ø65-100 mm

04-00021

Developed for use with the following cylinders; 1090-02-WAL, 1090-03 and 03-00028/ 01-00030.

The holder is designed for use on the cylinders with hand held use and for use on a floor stand or gear box lift. Adjusting and locking of the cylinder is very easy and flexible for simple use. Also other cylinder brands and types from Ø65 – 100 mm can be mounted in the holder. Fits gearbox lift and floor stands with axles measuring from 25 - 30 mm.

Contains these parts:

- 04-00021-001 - Holder without clamps
- 04-00021-013 - Clamp Ø70 mm
- 04-00021-014 - Clamp Ø85 mm
- 04-00021-015 - Clamp Ø100 mm

Used with cylinder:

- 1090-01 (16 T)
- 1090-02 (22 T)
- 1090-03 (14 T)
- 03-00028 (32 T)
- 01-00030 (18 T)

Hand held

Gearbox lift and floorstand

Pneumatisk, variable hydraulic pump**1036****Pneumatic driven hydraulic pump with variable speed for better control.**

The pump is delivered with a pressure gauge and 2,2 m hose and drip-free quick coupling. Oil tank volume 1,3 litres

Contains these parts:

1. 1-1036 - Pneumatic, variable hydraulic pump
2. RES 1030-02 - Hydraulic hose for 1030 & 1036
3. RES4304 - Hydraulic quick coupling, female
4. 1036-10 - Anslutningsslang luft
5. 04-00003 - Connecting hose, air

For use with all our hydraulic cylinders (Max pressure 700 bar)

5

**Build pressure****Release pressure**

2,2 m hose and drip-free quick coupling with locking function. The core is protected with double wire braids for extra safety and longevity.

Hydraulic foot pump**1030****Hydraulic foot pump 700 bar for use with all our hydraulic cylinders.**

2,2 m hose and drip-free quick coupling. Oil tank volume 0,75 litres.

Contains these parts:

1. 1-1030 - Hydraulic foot pump
2. RES 1030-02 - Hydraulic hose for 1030 & 1036
3. RES4304 - Hydraulic quick coupling, female

For use with all our hydraulic cylinders (Max pressure 700 bar)

2,2 m hose and drip-free quick coupling with locking function. The core is protected with double wire braids for extra safety and longevity.

04-00015**Safety cover with catch strap**

Additional item for hydraulic operation directly on the car. Prevents damage if parts brakes or falls down.

**04-00016****Pressure gauge for hydraulic pumps 1030**

Complete kit with coupling and nipple for connecting directly to any Wallmek hydraulic pumps. The hydraulic cylinders manual. Includes a chart that shows the maximum oil pressure in bars for each different drawbars

**Hydraulic oil 1 L****04-00020**

High quality hydraulic oil, optimal for Wallmek's hydraulic tools and pumps. Regular hydraulic oil change and correct volume increases the operation time of the components.

ISO VG 32

Universal set for master track pins

03-00050

This set is primarily developed for disassembly and assembly of master track pins.

With our 45 T hydraulic cylinder 03-00026 and hammer function the effect on the pin will be a full 157 Ton during disassembly. The tool is clamped onto the track with the help of the fixing plate and the job can be performed by one mechanic without extra help. All parts are manageable in terms of weight and easy to mount on the machine.

This makes the tool very portable and flexible for both the workshop and the field. Internal dimensions of adapters for pins: Ø35, 39, 45.4, 48.2mm.

Recommended cylinder 03-00026, 45 Ton.

Contains these parts:

1. 03-00050-100
2. 03-00031-002 - Plate with thread (2 pcs)
3. 03-00032-101 - Press axle L = 137 mm
4. 03-00032-102 - Extender L = 65 mm (2 pcs)
5. 03-00032-001 - Press axle L = 30 mm
6. 03-00032-002 - Press axle L = 140 mm
7. 03-00048-042 - Extender L = 50 mm
8. 03-00048-043 - Extender L = 70 mm
9. 03-00048-044 - Extender L = 100 mm

Add-on set for 03-00031-001

03-00050-100

To be used with 2 plates with thread 03-00031-002 and press axle set 03-00032-050

The Universal set is also available as an add-on set, which comes without the two forged threaded plates 03-00031-002 and press axle set. Good upgrade for those who already have these extenders and pressaxles.

Recommended cylinder 03-00026, 45 Ton

Contains these parts:

1. 03-00050-001 - Press adapter, inside Ø35 mm (2 pcs)
2. 03-00050-002 - Press adapter, inside Ø39 mm (2 pcs)
3. 03-00050-003 - Press adapter, inside Ø45,4 mm (2 pcs)
4. 03-00050-004 - Press adapter, inside Ø48,2 mm (2 pcs)
5. 03-00050-005 - Adapter
6. 03-00050-006 - Fixing plate
7. 03-00050-007 - Threaded support rod, L = 383 mm (2 pcs)
8. 03-00050-008 - Threaded support rod, L = 557 mm (2 pcs)
9. 09-000196 - Nut M36 (4 pcs)

In use

Press block

03-00031-500

Extra wide press block developed for crane cars and the kingpins in the crane arms.
Fits everything from crane cars to container side-loaders.

Contains these parts:

1. 03-00031-502 - Fixing plate extra wide, threaded (2 pcs)
2. 03-00031-201 - Support rod 595 mm (2 pcs)
3. 03-00003-005 - Screw M22x60 12.9, allen (4 pcs)

The press block will fit these support rods as well: 390 mm rod (03-00004-003), 500 mm rod (03-00003-004)

Used with

32 ton (03-00028)
45 ton (03-00026)

Bolt Removal Tool – Hydraulic Lift Cylinder Disassembly for Fendt and More

03-00045

The set fits both the upper and lower bolts during disassembly of the hydraulic lift cylinder mounted on Fendt and Massey Ferguson tractors.

The press block **1090-55-C** together with the 18T hydraulic cylinder **01-00030** is used in combination with the kit to provide access and force. Over time, both bolts tend to seize in the tight and exposed area of the lift unit. The kit is designed to, together with the accessories, access both bolts during disassembly. In addition to these bolts, the hydraulic cylinder and press block are also highly useful for various other repair tasks on machinery.

Contains these parts:

1. 03-00045-001 - Press adapter L=65 mm
2. 03-00045-002 - Press socket Ø42 mm
3. 03-00045-003 - Press socket Ø52 mm
4. 03-00045-021 - Slotted tube L=135 mm

In use

32T Universal basic set for commercial truck and bus garages

03-00021-020

Dismantling tools for steering joints, wheel bolts, wheel hubs and slack adjusters.

This set comes with the tools needed for straight and conic kingpins, spring bushings, drawbars and large lock rings.

Contains these parts: 03-00021-020, 32T

1. 03-00016-001 - Press foot for hub puller (2 pcs)

2. 03-00003-005 - Screw M22x60 12.9 (2 pcs)

3. 01-00004 - Lock ring tool

4. 04-00028 - Hydraulic ball joint puller

5. 03-00028 - Hydraulic cylinder 32 ton

6. 03-00006-013 - Press plate Ø 59 mm

7. 03-00006-014 - Press plate Ø 63 mm

8. 03-00006-015 - Press plate Ø 50 mm
9. 03-00006-016 - Press plate Ø 44 mm

10. 03-00006-017 - Press plate Ø 63 mm

11. 03-00006-018 - Press plate Ø 57 mm

12. 03-00006-021 - Press plate

13. RES4026 - Drawbar M18/M22, 250 mm

14. RES4024 - Flange nut M18

15. 03-00031-32T - Universal set for Kingpin

When Tools Become Poetry

We've long had a romantic idea of tools. Solid stuff. Steel things you hold in your hand that just get the job done. A hammer hammers. A jack lifts. A wrench tightens the nut until it clicks—or breaks. There's something reassuring about that—clear roles, no surprises. Like an old boys' room: you knew what was what, who did what, and nothing had to be questioned.

But then the world got complicated. Trucks became computers on wheels. Workshops started looking like operating rooms. And suddenly, an old toolbox from the '80s didn't cut it anymore. Sheer force wasn't enough—you needed finesse, too.

That's where Wallmek steps in—not as a quick fix, but as a whole way of thinking. They don't just make tools. They build systems. Not just a new product line—but a new language for solving problems that are no longer simple or predictable.

Take their 45-ton hydraulic cylinder. It's not just a beast that looks like you'd need a license to handle—it also knows when the job is done.

It rebounds with the confidence of an elite athlete, not some old press. And maybe that's the most surprising part: that something so brutally strong and unexpectedly smooth doesn't just exist—it outperforms everything else.

And that's the thing about Wallmek. Everything they do is built on the idea that things change. A tool that's pressing out a wheel bearing one moment can be dismantling a bushing the next—without hesitation.

And bushings... well, that's a story in itself. Because if anything can turn a seasoned mechanic into a cursing amateur archaeologist, it's rusted-in bushings.

They sit there, in the backbone of the vehicle, like they've been welded into the DNA of the metal. But with the right tool—like one from Wallmek—they're no longer a battle. They're just a task. In and out. That's it.

So what is Wallmek, really? It's like someone took the soul of the old workshop—the steel, the grip, the smell of grease and iron—and gave it a brain. Not to make things harder, but so you don't have to bang your head against the wall every time the auto industry comes up with something new.

Because in a world where problems are multiplying, the tools have to get smarter. And maybe—just maybe—the manliest thing isn't to never give up, but to know when it's time to change your approach.

"Brutally powerful and surprisingly graceful."

Tool trolley with 9 drawers

04-00022

Double tool trolley with totally 9 drawers developed for Wallmek toolsets and foams.

The trolley is equipped with a large top drawer for cylinders and accessories. All drawers are locked individually and with a central lock system for extra safety during transport, storage and normal use. All drawers open fully with heavy duty ball bearing slides. Tools and foamer are ordered seperately.

Internal measurements for each drawer:

H 100×B 585×D 418 mm (4 pc)
H 155×B 585×D 418 mm (3 pc)
H 263×B 585×D 418 mm (1 pc)
H 135×B 1247×D 418 mm (topdrawer) (1 pc)

Dimensions: H 1155×B 1375×D 480 mm

Weight: 158 KG

The large axle wheels in combination with four swiveled wheels make the trolley easy to handle fully loaded with tools.

Our storage system is made for automotive and truck garages that wants to take the next step in efficiency and profit. The technician can put all his time towards finishing the job instead of spending time trying to find the right tools.
"The system simplifies inventory, replenishment, and control of special tools – everything has its place."

Tool cart

04-00022-300

This sturdy construction comes with a large working surface. The large wheels makes it easy to transport even when fully loaded.

4 sturdy shelves which has been designed to hold our foams and a large storage area/working surface at the top.
Tools not included.

Dimensions H 1250×B 800×D 630 mm. **Weight:** 38 KG

04-00022-301 Removable storage shelf.

1 included, can be purchased seperately.

4 sturdy shelves designed to hold our foams.

Foam to SAF, BPW etc.

04-00022-013

Tool foam, tools not included. **Foam dimensions:** 580 x 415 x 40 mm. **Maximum height with tools:** 90 mm

Tool foam to 03-00035-300

04-00022-016

Tool foam, tools not included. **Foam dimensions:** 580 x 415 x 40 mm. **Maximum height with tools:** 125 mm

Tool foam to 03-00031-32T/45T

04-00022-024

Tool foam, tools not included. **Foam dimensions:** 580 x 415 x 40 mm. **Maximum height with tools:** 100 mm

Tool foam for truck hub

04-00022-025

Tool foam, tools not included. **Foam dimensions:** 580 x 415 x 40 mm. **Maximum height with tools:** 120 mm

Foam to 04-00028, Bat-Truck etc.

04-00022-026

Tool foam, tools not included. **Foam dimensions:** 580 x 415 x 40 mm. **Maximum height with tools:** 150 mm

Foam to truck bushings

04-00022-027

Tool foam, tools not included. **Foam dimensions:** 580 x 415 x 40 mm. **Maximum height with tools:** 210 mm

Foam to 03-00008 and 03-00020

04-00022-028

Tool foam, tools not included. **Foam dimensions:** 580 x 415 x 40 mm. **Maximum height with tools:** 120 mm

Our foamers are custom-designed to fit Wallmek's tool trolleys.

The trolleys offer a generous work surface. With our tool trolleys, you'll work more ergonomically, efficiently, and in a well-organized way.

Wallmek – when you want to save time and work smarter.

INVEST IN TIME

Fuel tank drainer 115L, with EX certificate

L1050-E

- ✓ Made of stainless steel with a volume of 115 liters.
- ✓ Approved for petrol, diesel, and ethanol.
- ✓ Uses vacuum when draining the car, and pressure when emptying the fuel drainer.
- ✓ Large wheels make it mobile and easy to move.
- ✓ The fuel drainer has an overfill protector, safety vent and pressure regulator.
- ✓ No movable parts that can get damaged by fuel or particles.
- ✓ Safe, fast (max 15 l/min) and quiet operation.

Comes with the drainer:

1. L1054-1 - Fuel refill pipe, 15 litre/min.
2. L1054-2 - Suction adaptor, coned.
3. L1063 - Stainless steel hose with quick coupling for draining fuel through long, bent and complicated fuel tank filler necks with L1050 and L1050-E.

Diameter: 12 mm. **Length:** 1,9 m.**Suction capacity:** 7 litres/min

Water separator, Petrol, Diesel and Ethanol (E85)

L2015

Cleans petrol and diesel effectively from water and particles.

For mounting on fuel tank drainer no: L1050-E.
Easy inspection through sight glass.
Drains from bottom valve.
Volume: 3,5 litres.
Picture shows separator fitted on fuel tank drainer.

Liquid indicator ½"

05-00001

For mounting on the fuel tank drainer fuel hose. ½" pipe thread.

Oil drainer 115l, with EX- certificate

L2430

Designed and developed for long lifetime and safe draining of waste oil for Auto shops and recycling stations.

A cars engine oil will get diluted with fuel over time. The resulting waste product is classified as a flammable liquid. It can catch fire easily and must be handled with products designed and approved for handling this liquid. This means the oil drainer needs to be delivered with a manual with an EX classification plan and approval for **EX-classed environments!**

This oil drainer is also equipped with a grounding cable, antistatic wheels, and hoses to decrease risks further. The pressure vessel is made from stainless steel and has no moving pump parts. With robust valves, hoses, and connections, this oil drainer is safe to use and has a long life.

The drainage tray is made of aluminium and measures 890 mm (L) by 490 mm (W). This generous size allows for the draining of the engine and gearbox simultaneously. The drainer can also suction oil/ AdBlue/glycol/washer fluid with a powerful vacuum, even while draining with the tray. The container is emptied by air pressure, no extra pump is needed to transfer the waste oil to external storage tanks. Probes for draining rear axles, gearboxes and power steering systems are included with the drainer.

Oil drainer 115 l

- ✓ The drainer is delivered with a grounding connection, antistatic hoses, and wheels.
- ✓ Adapter kit with four suction probes included.
- ✓ No moving pump parts.
- ✓ Oil pan made of durable aluminum.
- ✓ Simultaneous draining of engine and gearbox possible
- ✓ The container is made of stainless steel.
- ✓ Suction oil/ AdBlue/glycol/washer fluid .

In use

**Save time. Save money.
Save the environment. With Wallmek.**

We believe in simplicity – in powerful solutions that not only change the way you work, but also the way you think about repairs. Our specialized tools are not just effective – they're a revolution in sustainability.

By repairing instead of replacing entire units, you save resources and reduce CO₂ emissions. It's a win-win – for you and the environment. We've designed our tools to deliver superior performance, year after year. For every use. For every repair.

More than just tools.

When you invest in Wallmek, you're investing in the future. Each product is carefully developed to last and to make a difference.

Our commitment is simple:

To help you work smarter while doing something good for the planet.

More efficient. More sustainable. Better.

Wallmek is more than just tools – it's a step toward a greener future. Choose innovation. Choose sustainability. Choose Wallmek.
